MEET AUDRIUS MARCINKEVICIUS

Cybersecurity Analyst at BlueBridge, Lithuanian Military Veteran, and LCC Cybint Bootcamp Graduate

After 27 years of work at the Lithuanian National Defense System, Audrius was ready to make his next career move. He was in search of the hands-on learning that would start his future career in the cyber field. Despite his vast experience, he began the Cybersecurity Bootcamp with minimal IT and cyber knowledge.

LEARNING AT THE LCC CYBINT BOOTCAMP

Audrius said that "The LCC Cybersecurity Bootcamp stood out for the high technological quality of the program. It included virtual machines, network modeling, and situation simulation software." The Cybint Cybersecurity Bootcamp teaches the theoretical knowledge needed and hands-on skills needed, both aligned to the NIST and NICE frameworks, to succeed in the field.

LIFE AFTER GRADUATION

Audrius received a job offer from one of the strongest IT companies in Lithuania. He is now a Cybersecurity Analyst at BlueBridge. His next goal is to become a SOC Security Analyst and continue his professional development in Ethical Hacking and Penetration Testing.

"OVERCOMING EACH CHALLENGE IN THE PROGRAM RAISED MY CONFIDENCE IN MY ABILITIES.

Because of my lack of knowledge in IT and cybersecurity, I had some hesitations about success and a real opportunity. However, overcoming each challenge in the program raised my confidence in my abilities. Thanks to LCC and Cybint, I have taken a big step forward, especially in the area of practical skills."

LCC Cybint Bootcamp Graduate
Cybersecurity Analyst at BlueBridge

2 weeks
after graduation, Audrius landed his 1st Cybersecurity Job

4 million
and more jobs are available in the cyber field

★★★★★

"If the Bootcamp produces candidates like Audrius, bring them on!"

POVILAS KAMINSKAS
Head of SOC at BlueBridge

BlueBridge provides IT services and solutions to businesses and government organizations, from cloud computing to infrastructure management. Its Security Operation Services (SOC) provide **SOC tool maintenance, cybersecurity analytics, and Security Event Information and Event Management (SIEM) and Endpoint Threat Detection and Response (EDR) tools.** In collaboration with LCC, BlueBridge is offering 2 full time scholarships for Bootcamp participants in the next cohort. After completing the program, the scholarship recipients are guaranteed employment at BlueBridge.
